DETAILED ACTION

Oath/Declaration

1. The Oath/Declaration is objected to because the title of the invention (i.e., "An intervertebral spacer device having a multi-pronged domed spring") does not match the title of the invention according to the Bib Data Sheet and US 6,645,249 B2 (i.e., "Intervertebral spacer device having a multi-pronged domed spring"). Correction is required.

Specification

2. The disclosure is objected to because of the following informality: please update the CROSS REFERENCE TO RELATED APPLICATIONS section (i.e., now US 6,673,113). Also, it seems the title of the invention should read "Intervertebral spacer device having a multi-pronged domed spring". Appropriate correction is required.

Claim Objections

3. Claim 1 is objected to because of the following informality: please add --multi-pronged domed spring-- in front of "restoring" (see line 8). Appropriate correction is required.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

Art Unit: 3738

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 1-7 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6 of prior U.S. Patent No. 6,645,249 B2. This is a double patenting rejection.
